

## Carriage for Forklift

Forklift Carriage - Rated by the fork carriage lifting capacity, there are four sizings of hook type fork carriages. The hook type tine carriages have been standardized.

Class I carriages are rated for loads as much as 2000 lbs. The carriage bar spacing used for Class I is thirteen inches. Class II carriages are rated for loads as much as 5,550 lbs. Their carriage bar spacing is 16 inches. Class III carriages are rated for cargo as much as 10,000 lbs. The carriage bar spacing for this class is 20 inches. Class IV carriages are rated for cargo as much as 15,500 lbs. The carriage bar spacing used for this capacity is 25 inches.

Pin mounted tines differ by the amount of offset between the tine and the blade eye. Some manufacturers would vary the carriages for pin type tines. Carriage capacity will be determined by the carriage pin size and by the fork size.
